

Forged steel valves gate, globe, and check

ASME CLASSES 150 – 4500
NPS 1/4 – 4 (DN 8 – 100)
API 602/ASME B16.34

VELAN

VELAN'S PROFILE

VELAN AT A GLANCE

History

- Founded in 1950

People

- Over 2,000 employees

Product line

A world-leading range of valves across all major industrial applications:

- Cast steel gate, globe, check, and ball valves
- Forged steel gate, globe, check, and ball valves
- Triple-offset butterfly valves
- Knife gate valves
- Severe service valves
- Bellows seal valves
- Steam traps

Quality

Velan holds major applicable approvals:

- ASME N/NPT
- ISO 9001
- ISO 14001
- OHSAS 18001
- PED
- API
- SIL, and
- TA-Luft
- Comprehensive quality programs that are compliant with the most stringent industry standards such as ISO 9001, API Q1, NCA 4000, ASME NQA-1 and 10 CFR 50 Appendix B.
- Velan has been surveyed and audited by leading organizations around the world such as Bureau Veritas, API, ASME, NUPIC, Newport News Shipbuilding, and DCMA.

Headquartered in Montreal, Velan has several international subsidiaries.

www.velan.com

Velan is one of the world's leading manufacturers of cast and forged steel gate, globe, check, ball, triple-offset, knife gate, highly engineered severe service valves, and steam traps offering superior performance across all major industrial applications including: fossil, nuclear, and cogeneration power; oil and gas; refining and petrochemicals; chemicals and pharmaceutical; LNG and cryogenics; marine; HVAC; mining; water and wastewater; pulp and paper; and subsea. The company also supplies actuators and integrated control packages.

Founded in 1950, Velan has earned a reputation for product excellence and innovation by bringing to the market superior products with special emphasis on quality, safety, ease of operation, and long service life. Velan valves have an extremely broad installation base and are approved by major companies worldwide.

MANUFACTURING PROGRAM

Small forged steel valves in carbon, alloy, and stainless steel
NPS ¼–4 (DN 8–100)

Valve type	Bonnet type	Bonnet joint	Flanged ends	Threaded or socket weld		Butt weld ends	Male / female ends
				Conventional port	Full port		
GATE	OS & Y	Bolted	150, 300, 600, 1500, 2500	800, 1500, 1690	800, 1500	1500, 2500	
	OS & Y	Welded	150, 300, 600, 1500, 2500, 4500	800, 1500, 1690, 2500, 4500	800	1500, 2500	800, 1500
GLOBE		Bolted	150, 300, 600, 1500	800, 1500, 1690		1500	
	OS & Y	Welded	150, 300, 600, 1500	800, 1500, 1690		1500	
		Y-pattern	1500, 2500	1690, 2680, 4500	1690, 2680, 4500		
Valve type	Type	Cover joint	Flanged ends	Threaded or socket weld		Butt weld ends	
				Conventional port			
CHECK	Piston	Bolted	150, 300, 600, 1500	800, 1500		1500	
	Piston	Welded	150, 300, 600, 1500	800, 1500		1500	
	Ball	Bolted	150, 300, 600	800, 1500		1500	
	Swing	Bolted	150, 300, 600	800			
	Swing	Coverless		800			
	Inclined piston	Welded	1500, 2500	1690, 2680, 4500		1690, 2680, 4500	

SEMI-AUTOMATIC ASSEMBLY AND TESTING PLANT

For Class 800 (API 602) gate valves

EXCLUSIVE DESIGN FEATURES

Stronger, leakproof body-bonnet joint fully encased spiral wound gasket

The design of the gasketed joint is critical. Its compression is better controlled in a fully enclosed cavity. Also, the possibility of unwinding of the SS spiral metal is eliminated.

Stronger bolting ensures joint tightness

Simple stress vs. deflection tests conducted on spiral wound gaskets in our laboratory confirmed that the control of leakage is highly dependent on gasket seating stress and that the values shown in the **ASME Section III Code**, namely the seating factor $m = 3$ and the seating stress $y = 10,000$ psi used in calculating bolt sizes, are highly insufficient.

Our bolted joints are calculated to a minimum gasket stress of 16,000 psi which is essential for a leakproof joint.

GASKET OD	ASME m	VELAN m	ASME y	VELAN y
2 - 5.5"	3	7	10,000	16,000 - 28,000

Threaded-in strength welded bonnets (full-penetration welds on special orders only)

Valves with threaded-in strength welded bonnet offer an additional level of safety against fugitive emissions.

The body-bonnet welds are made on fully automatic MIG Welders. Weld hardness is controlled (including the heat-affected zone) and maintained below 200 HB.

Right: Automatic MIG welder.

Note: CoCr alloy as used throughout this catalog refers to cobalt chrome hardfacing alloys as supplied by Kennametal Stellite™, and other approved manufacturers.

Safer and tighter stem seal

- Stem hardened and ground.
- Two-piece self-aligning gland.
- Each packing ring individually inserted and compressed for better tightness.
- Sturdy full-length threaded corrosion-resistant bolts provide the required high packing stress.
- Live-loading optional.
- Positive backseat: stem bevel against integral backseat.

Two-piece stem drive renewable in-line

This exclusive and handy feature found only on Velan small forged OS & Y gate valves enables:

- Replacement of stem nut in-line.
- Removal of handwheel without affecting the position of valve (closed or open).
- Better stem nut lubrication control.

Body-guided disc in globe stop, needle and stop-check valves eliminates side thrust on stem

The top-and-bottom guided disc assures perfect seat and disc alignment in spite of side thrust caused by high velocity flow. This prevents stem from scoring and galling and provides longer disc seal and body life.

Solid CoCr alloy disc for full CoCr alloy trim

Solid CoCr alloy disc for all y-pattern valves

Body-guided disc in piston-check valves

- Assures perfect alignment of disc and seat even at large flow velocities.
- Flat seating faces for low and medium pressures.

DESIGN OF STEM SEALS FOR LOW EMISSIONS

Test results lead to design of long-life leakproof stem seal

The Velan stem seal evolved from these test findings:

- **Large loads.** Sealing is achieved when compression load is high and packing forms a mass of close fibers of low porosity and permeability (4,000 psi for graphite).
- **Short and narrow packing chambers** improve sealing.
- **Small clearances between vital parts.**
- **Precision stem and packing chambers.** Straightness, roundness and fine finish of stem and packing chamber wall are essential.
- **Short and narrow packing chamber.** Maximum six rings in a single set chamber, and wherever possible, only $\frac{3}{16} - \frac{1}{4}$ " (4.76–6.35 mm) wide.
- **Rings precompressed** to 3500–4000 psi for graphite and to 1800–2000 psi for PTFE to ensure equal stress distribution and effectiveness of all rings.
- **Stem and packing chamber walls.** Close roundness, straightness and superior 8–16 RMS or burnished surface finish.
- **Live-loading (optional).** Two sets of Belleville springs maintain a permanent packing stress of 3500–4000 psi.

Photos illustrate packing machine and bonnet assembly machine.

FUGITIVE EMISSION TESTING

Why fugitive emission (FE) testing is so important

- In a typical petroleum plant, 60% of fugitive emissions are from valves. Therefore it is extremely important to reduce valve emissions to the greatest degree possible.
- Four widely recognized standards regarding valve fugitive emissions are ISO 15848-1, ISO 15848-2, API 622, and API 624.
- Velan offers standard cast steel bolted bonnet gate and globe valves qualification tested for compliance with ISO, API and EPA fugitive emission requirements.
- The primary intention of API 622 compares performance of different packing brands.
- Different packing arrangements are available upon request.

ISO 15848-1 type test and ISO 15848-2 production tests	API standard 622 FE test in a test fixture	API Standard 624 FE type test in a valve
● Introduced in 2006. ● Velan has tested our standard packing set to ISO 15848-1 and re-validated our FE certification. ● Uses the "global" test method. ● ISO 15848-1 test is carried out with a standard valve and additional bonnet enclosure.	● Introduced in 2006. ● Velan has tested our standard packing set to API 622 and re-validated our FE certification. ● Uses the "sniffing / flushing" test method (local method). ● API 622 test is carried out in a test fixture designed to simulate a valve.	● Expected release in 2013. ● Intended for low fugitive emissions valves. ● Uses sniffing as a test method. ● Testing is carried out using assembled valves. ● Tested valve qualifies a range of sizes and classes.

FLANGED BOLTED BONNET
0054B – Class 150 2054B – Class 600
1054B – Class 300 3054B – Class 1500

DESIGN FEATURES

- A compact but extremely sturdy design for high pressure-temperature service.
- Solid CoCr alloy wedge (optional) ensures low friction and long service life.
- For Class 1500 valves and for steam service, seats are seal-welded to the body.
- Packing rings are precompressed to 4000 psi to provide a high integrity seal.
- For welded bonnet valves, the bonnet is threaded in and torqued to an engineered torque value and the body bonnet joint is strength-welded, offering double protection against leakage. (body/bonnet threads and strength-weld).
- Fully guided wedge reduces wear on seating surfaces.
- Repairable 2-piece stem drive.

OPTIONAL FEATURES (SPECIAL APPLICATIONS)

- A special design is also available with double packing, leak-off connection, live-loading and a packing blowout for easy removal of old packing.
- Bolted bonnet gate valves for alkylolation service (HF acid service see page 21).
- Parallel slide gate valves.
- API 603 NPS ½–1½ (DN 15–40), for ASME Classes 150, 300, and 600.

(2) Full bore also available for Classes 800 and 1500

VELAN FORGED STEEL EXTENDED BODY GATE VALVES

CONVENTIONAL PORT, THREADED OR SOCKET WELD FEMALE

NPS ½–2 (DN 15–50), API 602, ASME CLASSES 800, 1500

**INTEGRALLY-REINFORCED
EXTENDED BODY – 2174W**

EXTENDED BODY – 2184W

PART	STANDARD MATERIALS
Body	A105
Bonnet	A105
Packing flange	A105
Seat	Gr. 410 (stainless) HF CoCr alloy
Wedge	CA15 HT or CoCr alloy
Stem	Gr. 410 (stainless)
Stem nut	Gr. 416 (stainless)
Yoke bushing	Steel
Gland	Gr. 416 (stainless)
Packing	Graphite
Gland bolt	Gr. B6 (stainless)
Gland nut	Gr. 2H
Handwheel	Malleable iron
Handwheel nut and lockwasher	Steel
Name plate	Aluminum

For other materials, trims, and engineering data, see pages 23–35.

TWO TYPES

- This valve is available with an extended body or an integrally-reinforced extended body (IREB).
- Extended body gate valves have a welded or NPT connection and are used for tapping of pressure vessels and header lines for vents, drains or takeoff lines and instrumentation.
- Also available: extended body assemblies for vents, drains, and instrument root valves.

AVAILABLE VARIATIONS⁽²⁾

THROTTLING GLOBE VALVES

Regular style globe valves are suitable for moderate throttling applications. As a general rule, an adequately sized globe valve (i.e. with pipe velocity between 15 to 25 ft/sec for water and 200 to 300 ft/sec for steam) should not be throttled down below 35% of its maximum full open Cv capacity (approximately 20% of full stroke). Harsh throttling, below 35% of full Cv capacity, will require analysis by applications department to determine suitability under possible cavitation, flashing, noise and vibration.

For Y-pattern globe valves, see page 12.

VELAN FORGED STEEL Y-PATTERN GLOBE VALVES

BONNETLESS, CONVENTIONAL PORT OPENING, THREADED, SOCKET WELD OR BUTT WELD

NPS ½–4 (DN 15–100), ASME CLASSES 1690, 2680, 4500

076Z

NON-ROTATING STEM

Patented for quick serviceability,
(USA patent number 4356832).

For more information consult
Velan's Y-pattern globe valve catalog
(CAT-BG) at www.velan.com.

DESIGN FEATURES

- Designed for quick and easy maintenance – one step removal of all working parts including packing.
- All pressure containing parts within one body-bonnet forging – no joints to leak or welds to cut for servicing.
- Non rotating stem allows a non-spinning disc, ensures low torque and prevents torsional damage of the packing.
- Fully enclosed, lubricated stem drive system with needle bearings ensures low operating torque.
- Solid CoCr alloy disc, seat ring and backseat provide excellent long service life even in severe services.
- Backseat bevel on the stem, not on the disc, satisfies both API-600 and API-602 specifications.

(1) For Classes 1690 and 2680, dimensions are as shown, or same as for NPS 2 (DN 50) valve, depending on end connection.

(2) Impactor handle.

(3) For butt weld weight is 110 lbs (50 kg).

(4) Butt weld or flanged connection only in these sizes.

(1) For Classes 1690 and 2680, dimensions are as shown, or same as for NPS 2 (DN 50) valve, depending on end connection.

(2) Butt weld or flanged connection only in these sizes.

(3) For butt weld weight is 87 lbs. (40 kg).

VELAN SPECIAL SERVICES

VALVES FOR NUCLEAR POWER PLANTS

FORGED CARBON, ALLOY AND STAINLESS STEEL GATE, GLOBE, AND CHECK VALVES FOR NUCLEAR POWER

NPS ¼–2 (DN 8–50) ASME CLASSES 150–1500

GATE VALVE

GLOBE VALVE

DESIGN FEATURES

- Sturdy bonnet arms.
- Suitable for electric actuation.
- More repacking space.

Gate valves

- Seal welded seats.
- CoCr alloy or cobalt free wedge and seats.

Globe valves

- CoCr alloy or cobalt free seats and discs.
- Stop, stop-check, needle, flow control
- Y-Pattern models for ASME Classes 1500 and 2500

OPTIONS

- Double packing with leak-off.
- Live-loading for nuclear and other critical services.
- Packing blowout fitting.

Live-loading option

for gate and globe valves

VELAN SPECIAL SERVICES

BELLOWS SEAL COMPACT FORGED STEEL 0 LEAKAGE VALVES

FOR HIGH PRESSURE, NUCLEAR, AND OTHER CRITICAL SERVICE

GATE VALVES - API 602, CLASSES 800 – 1500,
FLANGED ASME CLASSES 150 – 1500

GLOBE VALVES - ASME CLASSES 150 – 600

EXTENDED BODY (DRAIN) VALVES - API 602, CLASSES: 800 – 1500

Y-PATTERN VALVES - ASME CLASSES: 1500 – 2500

A valve with a bellows to seal off the stem enclosure is an ideal choice whenever leakage to the atmosphere is intolerable due to toxicity, chemical corrosion, radioactivity, other health or ecological reasons. In addition, seal welding the body-bonnet seal makes the valve hermetically sealed. The bellows is welded to the stem and to the bottom of the bonnet. Velan has been a leader in bellows seal valves since pioneering the technology in the 1950s.

DESIGN FEATURES

- **No torsion of bellows.**
Proper stem guiding of the non-rotating stem prevents torsion of bellows and ensures long cycle life on all valves.
- **Long cycle life bellows.** Designed for and successfully tested in highpressure/temperature applications.
- **The lift** is 50% in extension and 50% in compression.
- **Bellows available in SS 321, Inconel or Hastelloy.**
- **Two secondary stem seals:** a) backseat (stem bevel) protects from line pressure when open and b) stem packing.

CYCLE LIFE

- Axial movement of the bellows is limited to a maximum of 20 to 25% of the free length, depending on pressure-temperature and desired life cycle.

Velan bellows are designed for:

- 10,000 cycles for NPS ½–2 (DN 15–50) globe valves,
- 5,000 cycles for bonnetless globe valves
- 3,000 cycles for NPS ½–2 (DN 15–50) gate valves.

NPS ½–2 (DN 15–50) FLANGED OR WELDED ENDS

ASME CLASSES 150–1500

Velan boiler blowoff valves meet all applicable specifications of the ASME boiler code, U.S. military standards (listed on qualified product list), U.S. Coast Guard, American Bureau of Shipping and Lloyd's.

Flanged or welded ends	Class 600*	Class 1500	Class 2500
Basic steam rating	535 psi @ 850°F	1340 psi @ 850°F	2230 psi @ 850°F
Max. boiler pressure	935 psi	2455 psi	3206 psi
Maximum non-shock	1480 psi @ 100°F	3705 psi @ 100°F	6170 psi @ 100°F

* Use for Classes 300 and 400 boilers.

APPLICATIONS

- Power and utility boilers
- Cogeneration systems
- Chemical recovery boilers
- Wood-fired boilers
- Solid waste fuel-firing systems
- Circulating fluidized bed (CFB) boilers
- Industrial waste recovery and incineration plants

TYPICAL SERVICE

- Blowoff
- Acid cleaning
- Steam sampling
- Water/steam shut-off
- Gauge shut-off
- Main stop drains
- Chemical feed
- Vents
- Feedwater

Many installations use a tandem combination of two valves. The valve closer to the boiler should be wide open first and then the second valve opened slowly. At the end of the blowoff period, a reverse procedure should be used.

DESIGN FEATURES

These special blowoff valves are available in bolted bonnet angle and streamlined flow 45° inclined designs for Class 600 and 1500 primary service and in bonnetless angle and inclined designs for Class 2500.

- CoCr alloy seats and fully-guided CoCr alloy discs resist the excessive corrosion and erosion effects aggravated by grid and boiler scale particles and high temperature changes.

NOTE: See page 12 for Y-pattern globe valves or for more information consult Velan's Y-pattern globe valve catalog (CAT-BG) at www.velan.com.

VELAN SPECIAL SERVICES

CONTINUOUS BLOWDOWN AND BOILER PLANT SERVICE VALVES

Figure 105Y

NPS 1/2–2 (DN 15–50) FORGED ANGLE

ASME CLASSES 600, 1500, 2500

This valve is designed for continuous blowdown but can also be used for sampling and boiler feed pump bypass relief where high pressure drop causes erosion and cavitation which can destroy conventional globe valves. It incorporates a hardfaced CoCr alloy disc and seat and a venturi diffuser from stainless steel type 316. Orifice range: 1/8 to 1 1/8" (3.18 to 28.58 mm), depending on the capacity required.

FORGED CRYOGENIC VALVES

GLOBE VALVE

GATE VALVE

NOTE: For more information, see our cryogenic valves catalog (VEL-CRYO) at www.velan.com.

FORGED AUSTENITIC STEEL GATE, GLOBE, AND CHECK VALVES NPS ½–2 (DN 15–50)

ASME CLASSES 150–1500

The production, transport and storage of liquified gases such as Oxygen, Nitrogen, Argon, Natural Gas, Hydrogen or Helium down to -425°F (-254°C) presents several technical problems. Velan specially adapted extended bonnet valves offer safe and efficient service.

DESIGN FEATURES

- **Extended bonnets** with sufficient gas column length, usually specified by customer, are supplied for all valves to keep stem packing at sufficient distance away from the cold fluid to remain functional.
- **Solid CoCr alloy wedges** on NPS ½–2 (DN 15–50) valves operate with no galling in cryogenic service.
- **PCTFE and dualseal disc inserts (optional)** for globe and check valves check discs.
- **Cleaning:** All cryogenic valves are thoroughly degreased and cleaned and pipe ends are sealed to prevent contamination.

MATERIALS

- **Body and bonnet:** Austenitic stainless steel forgings used for bodies and bonnets offer excellent impact strength, minimal heat loss and protection against corrosion.
- **Stem:** To reduce galling, stems are made from advanced Nitronic 50 (grade XM-19 A479) with high tensile even at extreme low temperatures, excellent low friction and galling-free movement at points of stem contact.
- **Wetted parts:** All austenitic stainless steel and CoCr alloy.
- **Yoke bushings:** Bronze.
- **Packing:** PTFE or other plastic packing protected from freezing by a column of insulating gas.
- **Seating faces:** CoCr alloy is used to prevent seizing and galling. When extremely tight shut-off is required, globe and check valves may be supplied with PCTFE, PTFE or other soft inserts.
- **Bolting:** Strain-hardened austenitic stainless steel.
- **Lubrication of yoke bushing nut (yoke nut):** Exxon, Nebula EPI; Shell, Darina EPI; and Lubriplate, No. 930-AA or 930-AAA.

TABLE OF LIQUIFIED GASES

VELAN SPECIAL SERVICES

HYDROFLUORIC (HF) ACID PROCESSING VALVES

Hydrofluoric acid is one of the strongest and most corrosive acids. Industries using HF acid in their manufacturing process have placed an increasing emphasis on safety in using this product.

HF ACID GATE, GLOBE AND CHECK VALVES

NPS ½–2 (DN 15–50), ASME CLASSES 150–800

Fugitive emissions are a critical factor in the performance of any HF Acid valve and at Velan, we have been committed to reducing emissions beyond the industry standards, and providing the highest quality products to our customers for over 50 years. Velan offers a comprehensive line of Phillips and UOP approved API 602 gate, globe and check HF acid valves with several benefits.

DESIGN FEATURES:

- **Stem drive:** Two-piece allows for replacement of yoke bushing in-line, removal of handwheel without affecting position of valves (closed or opened).
- **Rising stem:** Makes for easy visibility for open-close indications.
- **Gland:** Two piece gland bushing/packing flange is self-aligning to prevent stem damage for cocked gland.
- **Stem made from hardened Monel K500** for strength and durability.
- **Nickel overlay in stem hole for carbon steel valves** to combat severe alkylation conditions.
- **HF acid detecting paint** to ensure valve sealing integrity.
- **Bonnet:** Large extended type bonnet grade.
- **Bonnet joint:** Encapsulated gasket design.
- **Body:** High quality Monel or A105 normalized body with API 602 wall thickness for maximum service.
- **Wedge** solid Monel.
- **Seat rings:** Made of solid Monel 400.

NOTE: For more information go to www.velan.com to download a copy of Velan's HF acid gate, globe and check valves flyer (FLY-HFA).

GATE VALVE

OPTIONAL DESIGN FEATURES

1. Nickel overlay packing box liner

2. Grease injector & lantern ring Where grease injection is a requirement (UOP only).

3. CTFE seat insert Resists abrasion and corrosion

VELAN SPECIAL SERVICES

CUSTOM DESIGN FABRICATED VALVES

Take advantage of increased flexibility with Velan custom-design fabricated valves

Illustration of a Velan custom design forged globe valve.

FABRICATED GATE, GLOBE, CHECK VALVES

NPS ½–2 (DN 8–50), ASME CLASSES 150–2680

As a leading manufacturer of API 602 forged gate, globe and check valves, Velan maintains one of the largest and most comprehensive inventories available from any manufacturer. Despite tens of thousands of ready-to-ship valves located around the world, requirements inevitably come up for non-standard items, and Velan has the perfect solution: fabricated valves.

Built from forged bar stock materials, Velan fabricated gate, globe and check valves offer the advantage of short lead times for non-stock items in exotic alloys.

Velan can readily provide fabricated valves in a wide variety of designs. Furthermore, our Engineering Department has the expertise to custom-design a valve to best handle your critical requirements. Backed up by advanced software tools, including finite element analysis, computational fluid dynamics and 3D solid modeling, Velan has a long history of designing and manufacturing superior quality valves that outperform the most demanding performance requirements.

FABRICATED DESIGN RANGE

- Gate
- Extended body gate
- Globe
- 45° inclined globe
- Critical services
- Y-pattern bonnetless globe
- Piston bolted cover check
- Ball type bolted cover check
- Coverless swing check

MATERIALS:

- Alloy 20
- Duplex
- F51
- F314L
- F347
- F9
- F91
- F44
- Hastelloy
- Incoloy
- Inconel
- Super duplex

Many other approved materials are also available.

CONNECTIONS:

- Butt weld
- Flanged
- NPT
- Socket weld

(6) Cr 13 available in soft form. Less than 237 HB.

Non-Cobalt hard facing alloy available.

Note: CoCr alloy as used throughout this catalog refers to cobalt chrome hardfacing alloys as supplied by Kennametal Stellite™, and other approved manufacturers.

ENGINEERING DATA

STEM PACKING

TYPE OF PACKING	TYPE OF SERVICE	SERVICE TEMPERATURE ⁽¹⁾
Die-formed graphite sandwiched between braided graphite, or an all braided graphite set	Steam, air, water, oils, liquified petroleum	Up to 1150°F (621°C)
PTFE V-rings	All acids, alkali, solvents, gases, except fluorine	-120 to 500°F (-84 to 260°C)
Braided PTFE	Hydrogen, peroxide, oleum, acids, alkali	-100 to 400°F (-73 to 204°C)

BODY-BONNET GASKETS

TYPE OF GASKET	TYPE OF VALVE	SERVICE TEMPERATURE ⁽¹⁾
Spiral wound Gr. 304 (stainless) + Graphite	Forged valves	Up to 1150°F (621°C)
Spiral wound Gr. 304 (stainless) + PTFE	Forged valves for chemical industry	Up to 500°F (260°C)
Spiral wound Monel + PTFE	Forged valves for chemical industry	Up to 500°F (260°C)

(1) Temperatures up to 1400°F (760°C) are available when specified.

TRIM MATERIALS

TRIM (CODE)	WEDGE/DISC SEATING SURFACE	SEAT SURFACE	STEM
13% Cr (TY)	CA15	CoCr alloy	410
Full CoCr alloy (TS)	CoCr alloy	CoCr alloy	410
316 (MY)	CF8M or 316	CoCr alloy	316
316 full CoCr alloy (MS)	CoCr alloy	CoCr alloy	316
Monel (XY)	Monel	CoCr alloy	Monel
Monel (XX)	Monel	Monel	Monel
Hastelloy (HC)	Hastelloy C	CoCr alloy	Hastelloy C
(SX)	CF8M	CF8M	316

HF (HYDROFLUORIC ACID) VALVES

PART	RECOMMENDED TRIMS FOR HF ACID SERVICE
Stem	Monel K
Wedge and disc	Monel or monel with PTFE, with additional side clearance to prevent buildup.
Seats	Monel
Gasket	Monel and PTFE
Packing	PTFE V-rings
Studs	A 193-B7M
Nuts	A 194-2HM

CHLORINE VALVES

PART	RECOMMENDED TRIMS FOR CHLORINE SERVICE
Stem	Monel K
Wedge and disc	Monel or Monel with PTFE
Seats	Monel
Gasket	Monel and PTFE
Packing	PTFE V-rings
Bolts	A 193-B7

Note: Special cleaning procedure and packing available.

SOUR SERVICE VALVES

Valves shown in this catalog are available with materials in compliance with **NACE MR0103** and **NACE MR0175**. The requirement for NACE compliant materials must be specified by the purchaser at time of inquiry and/or order. Please refer to the How-To-Order section at the end of this catalog for a listing of available NACE compliant trims. Please note that it is the equipment user's responsibility to select materials suitable for the intended service or to ensure that a material will be satisfactory in the intended environment.

NOTE: All other small forged steel valves NPS ¼–2 (DN 8–50) have pressure-temperature ratings to B16.34.

(1) Permissible but not recommended for prolonged use above about 800°F (425°C).

(2) Not to be used over 650°F (345°C).

(3) Permissible but not recommended for prolonged use above about 1100°F (595°C).

(4) Not to be used over 1100°F (595°C).

(5) Not to be used over 850°F (455°C).

(6) At temperatures over 1000°F (538°C) use only when the carbon content is 0.04% or higher (material code 10).

Selection Rules :

- A) Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 1000°F maximum.
- B) Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- C) Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- D) Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 1000°F.
- E) Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- F) Do not interpolate Limited Class above 900°F. Consult the factory.

(1) Permissible but not recommended for prolonged usage above 800°F.

Selection Rules :

- A) Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 538°C maximum.
- B) Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- C) Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- D) Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 538°C.
- E) Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- F) Do not interpolate Limited Class above 475°C. Consult the factory.

(1) Permissible but not recommended for prolonged usage above 425°C.

Selection Rules :

- A) Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 538°C maximum.
- B) Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- C) Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- D) Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 538°C.
- E) Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- F) Do not interpolate Limited Class above 475°C. Consult the factory.

(1) Permissible but not recommended for prolonged usage above 595°C.

Selection Rules :

- Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 1000°F maximum.
- Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 1000°F.
- Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- Do not interpolate Limited Class above 1000°F. Consult the factory.

(1) At temperatures over 1000°F use only when the carbon content is 0.04% or higher (material code 10).

Selection Rules :

- Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 538°C maximum.
- Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 538°C.
- Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- Do not interpolate Limited Class above 550°C. Consult the factory.

(1) At temperatures over 538°C use only when the carbon content is 0.04% or higher (material code 10).

Selection Rules :

- A) Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 1000°F maximum.
- B) Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- C) Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- D) Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 1000°F.
- E) Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- F) Do not interpolate Limited Class above 900°F. Consult the factory.

Selection Rules :

- A) Flanged-end valves may be rated 150, 300, 600, 900, 1500, and 2500 Standard Class only, 538°C maximum.
- B) Butt weld valves may be designated as Standard Class and Special Class, or Limited Class NPS 2½ (DN 65) and smaller.
- C) Socket weld valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class.
- D) Threaded-end or combination threaded-end valves are limited to NPS 2½ (DN 65) and smaller and may be designated as Standard Class, Special Class, or Limited Class, up to 2500 Class. The ratings terminate at 538°C.
- E) Special Class: Requires additional inspection per ASME B16.34, para. 2.1.3.
- F) Do not interpolate Limited Class above 475°C. Consult the factory.

(1) Bolted bonnet only

(2) Welded bonnet only

(3) 14 Cv for bolted bonnet & 7 Cv for welded bonnet

(4) Bolted bonnet Class 1690 only (horseshoe)

(5) With seat 1.25" and end-to-end 7.25"

NOTE: Metric Equivalent of Cv is Kv: $K_v = C_v \times 0.85$

HOW TO ORDER

Type of connection	Size of connection	Pressure rating	Valve type	Body/bonnet style	Body material	Trim material
A 	B 	C 	D 	E 	F 	G 
F	0 8	— 2	0 7	4 B —	1 3	M S

Example: is a NPS 2 (DN 50) 600 Class stainless steel bolted bonnet globe valve with MS trim.

A	TYPE OF CONNECTION	
B	Butt weld	S Thread NPT
C	Combination (socket weld/threaded)	U Undrilled flanges
F	Flanged B16.5 (B16.47 series A)	W Socket weld
R	Flanged ring joint	X Butt weld (intermediate class)

B

SIZE OF CONNECTION

Customers have the choice of specifying valve size as part of the valve figure number (B) using the numbers below, or indicating valve size separately. Sizes shown in NPS (DN)

EXAMPLES:
F08-2054B-13MS (valve size is part of figure number)
2F-2054B-13MS (valve size is shown separately)

01	¼ (8)	04	¾ (20)	07	1½ (40)	10	3 (80)
02	⅜ (10)	05	1 (25)	08	2 (50)	11	3½ (90)
03	½ (15)	06	1¼ (32)	09	2½ (65)	12	4 (100)

C	PRESSURE RATING	
0	150	4 2500
1	300	5 4500
2	600 or 800 API 602	6 400
3	1500	7 900

D	VALVE TYPE	
01	Flow control	11 Swing check
02	Ball check	14 Parallel slide
03	Piston check	15 Instrument
05	Conventional port gate	17 IREB gate
06	Full port gate	18 Extended body gate
07	Stop globe	21 Boiler blowoff
08	Stop check	22 Pressure relief
09	Needle	23 Double disc gate
10	Continuous blowdown	34 Tilting disc check valve

E	BODY/BONNET STYLE	
4	Vertical	B Bolted bonnet (forged)
5	Angle	D Diaphragm
6	Inclined y-pattern	E Extended bonnet (cryogenic)
7	Inclined y-pattern bonnetless 45°	R Forged bolted bonnet bellows seal
8	Elbow down	S Y-pattern bellows seal (non-rotating stem)
		T All welded bellows seal
		W Welded bonnet
		Y Bonnetless (rotating stem)
		Z Bonnetless (non-rotating stem)

Note: Velan valves for **NACE** service (as indicated by figure number and/or description) comply with the metallurgical requirements of the current NACE MR0103 and MR0175 / ISO 15156. Material selection is dependent on the actual environment and it is therefore the equipment End User's responsibility to ensure that the materials are suitable for the intended service. Please contact Velan for any questions regarding the application of our products for NACE service.

14	S/S F316L ⁽⁴⁾			

- (1) Must specify grade
- (2) Material Code "10" (F316H) has a minimum carbon content of 0.04% must be used when temperatures are above 1000°F (538°C).
- (3) Material Code "13" (F316) is not suitable for temperatures above 1000°F (538°C).
- (4) Material Codes "10" (F316H), "13" (F316), and "14" (F316L) are dual certified. If dual certification is required, F316 should be procured with a note that the valves should be dual certified with F316L. If this is specified on the order, then the MTR will state that the F316 valve will meet the chemical and mechanical properties of Dual Certified F316L.

G	TRIM (standard trims)				
Code	Wedge/disc surface ⁽¹⁾	Seat surface ⁽¹⁾	Stem	Bellows ⁽²⁾ (if applicable)	API Number
MS	CoCr alloy ⁽³⁾	CoCr alloy ⁽³⁾	316/316L	321	
MY	CF8M or 316	CoCr alloy ⁽³⁾	316/316L	321	12
TS	CoCr alloy ⁽³⁾	CoCr alloy ⁽³⁾	13 CR (410)	321	5
TY	13 CR (410 or CA15)	CoCr alloy ⁽³⁾	13 CR (410)	321	8
NA	13 CR (410 or CA15) HRC 22 max.	CoCr alloy ⁽³⁾	13 CR 410 HRC 22 max.		8 ⁽⁵⁾
NB	CF8M or 316	CoCr alloy ⁽³⁾	316/316L	321	12 ⁽⁵⁾
NC	Monel	CoCr alloy ⁽³⁾	Monel	Hastelloy C	11 ⁽⁵⁾
NE	CoCr alloy ⁽³⁾	CoCr alloy ⁽³⁾	13 CR 410 HRC 22 max.	Inconel 625	5 ⁽⁵⁾
NF	CoCr alloy ⁽³⁾	CoCr alloy ⁽³⁾	Same as body		
AS	CoCr alloy ⁽³⁾	CoCr alloy ⁽³⁾	321	321	
CS	Alloy 20	CoCr alloy ⁽³⁾	Alloy 20		
HC	Hastelloy C	CoCr alloy ⁽³⁾	Hastelloy C	Hastelloy C	
HM	HF-acid trim	HF-acid trim	HF-acid trim		
MC	CF8M or 316 with CTFE insert ⁽⁴⁾	CoCr alloy ⁽³⁾	316		
PA	NOREM	NOREM	630	Inconel 625	
US	CoCr alloy ⁽³⁾	CoCr alloy ⁽³⁾	S/S 616HT		
UY	13 CR (410 or CA15)	CoCr alloy ⁽³⁾	S/S 616HT		
XX	Monel	Monel	Monel		9
XY	Monel	CoCr alloy ⁽³⁾	Monel		11

- (1) Base material is either the same as the body or solid trim at manufacturer's option.
- (2) Bellows material shown as standard, Inconel can be used in lieu of 321 and Hastelloy C in lieu of Inconel, where design and/or pressure class applicable.
- (3) CoCr alloy (Grade 6 or 21) based on material or application at manufacturer's option.
- (4) Inserts may be in seat or wedge at manufacturer's option.
- (5) NACE service valves are supplied with all materials conforming to NACE MR0175. (Including bolting with max. hardness of RC22).

Note: CoCr alloy as used throughout this catalog refers to cobalt chrome hardfacing alloys as supplied by Kennametal Stellite™, and other approved manufacturers.

Consult Velan's website at www.velan.com, for diagnostic troubleshooting and available trim materials.

The most comprehensive line of industrial forged and cast steel gate, globe, check, ball, butterfly, and knife gate valves and steam traps.

ASME pressure classes 150–4500 in carbon, alloy, and stainless steel
