

Asset Management Solutions

About Asset Mate

Developed by Tyne Valves Limited, Asset Mate combines decades of process industry expertise with next-generation digital asset management.

Built around the challenges of process safety, traceability and maintenance, Asset Mate provides a structured, compliant and data-driven way to manage critical plant assets.

From shutdown planning and audit preparation to day-to-day maintenance, Asset Mate keeps asset data accessible, organised and inspection-ready.

Designed for industries including chemical, petrochemical, pharmaceutical, and food & beverage, our mission is simple: make compliance easier, maintenance more predictable and asset data more accessible.

How It Works

Take control of your assets in just a few steps, from registration and inspections to maintenance and reporting.

Register & Inspect

Create a digital profile for each asset, including key details, specifications and inspection records.

Centralise Documents

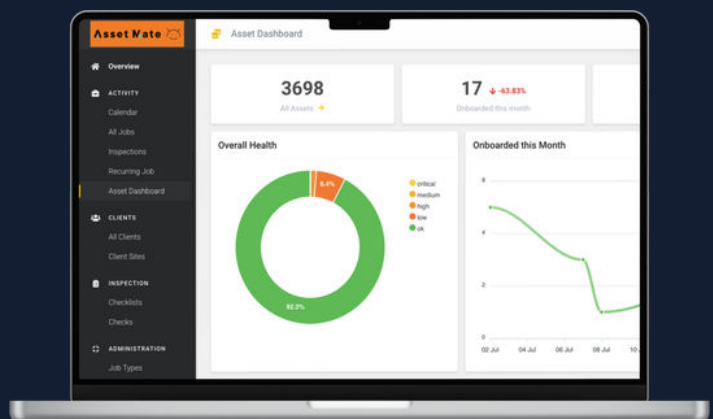

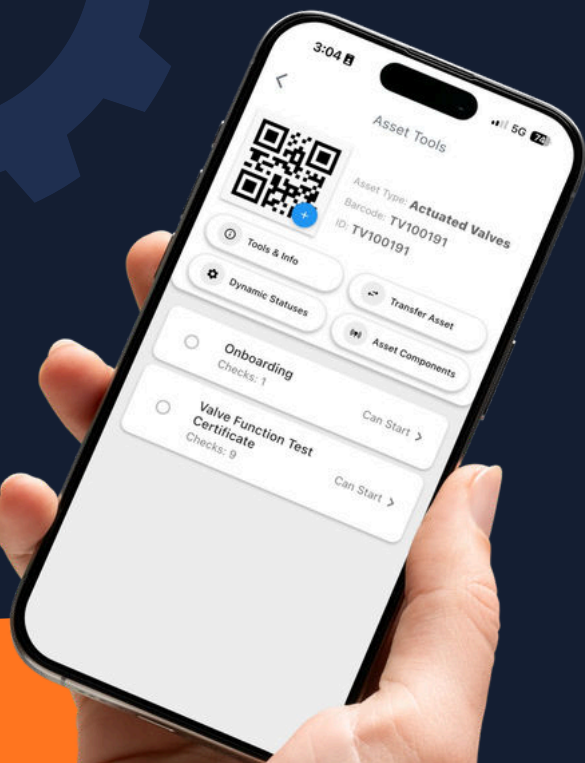

Store certifications, approvals and compliance records in one place. Schedule Maintenance Set automated reminders for inspections and certificate renewals.

Track & Analyse

View asset history, inspection results and maintenance records with full traceability.

Stay Audit Ready

Access complete, timestamped asset records whenever you need them.

Asset Types Covered

Asset Mate is designed to handle a wide range of equipment critical to process safety, production reliability, and site compliance.

Our Core Asset Categories are:

Flexible Hoses and Bellows

PTFE Lined, Metal and Hydraulic Hoses, PTFE, Rubber and Metal Bellows

Process Valves

Manual and Automated Valve Packages

Safety Devices

Pressure Relief Valves, Bursting Discs and other emergency systems

Vessels and Tanks

Pressure Vessels, Mixing & Reactor Vessels, Storage Tanks and Heat Exchangers and Air Handling Units, Hydraulic Cylinders

Instrumentation

Gauges, Transmitters and Monitoring Devices

Partnership Network

With the support of Tyne Valves and Tees Valves, Asset Mate customers benefit from improved service across multiple process sectors. Our strategically located facilities in Tyneside and Teesside enable us to support customers throughout the North East and beyond.

Asset Mate can access the extensive inventory and supply chain of Tyne and Tees Valves, helping meet urgent requirements during breakdowns.

Our qualified team provides on-site or remote consultancy, focusing on your assets and helping optimise their lifecycle. For flexible hose consultancy and inspection, we have several BFPA-qualified staff available.

Asset Mate also works closely with Aflex Hose, a world-renowned manufacturer of advanced PTFE-lined flexible products, ensuring reliable and compliant solutions for customer applications.
